Experiment - 11

Aim:

To ~~create~~ change a Hardware compatibility of VM which is already created and configured.

Procedure:

1. Go and install VM workstation
2. choose either cloned VM (or)
create new virtual machine
3. Before changing compability of Hardware, make sure that shutdown guest OS and VM.
4. select the VM in VMware workstation
5. select VM c manager
6. Click on the change Hardware compatibility
7. Next page allows you to change compability.
8. After that click next and finish
9. compatability of Hardware has been created

output:

VM → Manage →

change Hardware compatability

Virtual machine details:

state: poweroff

Result:

So, the
of VM
